

CLAMPS TECHS TRUST

Feature rich for HVACR pros

Packed with more features and measurements than any clamp meter in the HVACR industry, the SC640 features lead storage, a swivel head, test lead holder for safer testing, and a heavy duty magnetic strap.

The mid-sized SC440 meter is essential for all types of electrical HVACR testing. The dual display makes it easy to view both voltage and amperage readings at the same time. The non-contact voltage indicator and the probe holder make electrical testing safer.

The SC260 is a compact meter that easily fit in a pocket or glove box. These auto-ranging meters are affordable and convenient for HVACR electrical testing.

The clamp meter line from Fieldpiece is packed with the measurements HVACR professionals need to perform at their highest level. With fast temperature response, they move easily from hot rooftops to cold walk-ins without affecting accuracy, while the rugged casing holds up to rough HVACR working conditions.

Whether it's a compact meter for tight spaces, or the loaded meter with all the bells and whistles, Fieldpiece has the perfect meter so HVACR pros can do more — everyday.
