Zip-in® Self-Piercing sheet Metal Screws

Rated #1, Zip-in® screws are the best selling sheet metal screws worldwide.

A unique thread design and quality controlled manufacture spell the Zip-in® difference.

Zip-in's® sophisticated heat treat process allows the screw to taper to a fine, sharp point without sacrificing critical point strength. They are also faster driving, with a greater capacity for fastening heavier gauges of sheet metal than any other self-drilling type.

- 1.) Burr Free Hex Washer Slotted Head**
 - One 1/4 in. hex driver accommodates tall sizes of Zip-in screws.
 - Full 1/4 in. (No. 8) head will not strip out of hex driver opening at any ring operation.
- 2.) Undercut-Indented Hex Washer Slotted Head**
 - Undercut - Always seats flush.
- 3.) Combination Lead Double Thread**
 - Starting thread machined down to very tip of screw point.
 - Instantly penetrates and engages in heavy gauge sheet metal and layered light gauge.
- 4.) Sharp Tapered Point**
 - Quality controlled heat treat.
 - Sharp tapered point will not mushroom, break or walk.
 - Complete operator control with precise hole alignment.
